### **Aleksandr Semjonov, DVM, PhD**

Dr. Aleksandr Semjonov is a veterinary anaesthesiologist and senior lecturer in anaesthesia and intensive care at the Estonian University of Life Sciences. He graduated from the same university in 2011 and performed his clinical training in anaesthesia departments of Universities of Vienna and Helsinki. In 2012 he joined Wildlife Pharmaceuticals company in South Africa as a researcher and clinical advisor. Dr Semjonov obtained his Doctoral Degree in veterinary anaesthesia in 2021. Since 2016 he holds the position of Chief Clinical Officer at the Estonian University of Life Sciences, supervising work of Chair of Clinical Veterinary Medicine and Animal Clinic. Since 2023 he is also a chief veterinarian of Tallinn Zoo. He is an author of several scientific publications and book chapters in the

field of anaesthesia. Dr. Semjonov trains veterinarians in anaesthesia worldwide and since next year he will join the team of European School for Advanced Veterinary Studies (ESAVS) as a first Estonian lecturer. Dr. Semjonov has a special interest to lung mechanical ventilation, anaesthesia of cardiac patients and exotic animals and wildlife anaesthesia. Annual speaker at seminars and webinars of Veterinary Education Centre of Latvia for last 8 years! Everyone who has heard Dr. Semjonov speak at least once will agree that the lecturer provides a broad, in-depth multidisciplinary insight into a specific topic, being able to present it in an easy-to-understand and attractive manner.

**Nikolaj Oborin, DVM** - Veterinarian, graduated from Latvian Agricultural University, Faculty of Veterinary Medicine in 2014. Trained in exotic animal medicine in Brazil and Hungary. From 2017, he teaches exotic animal diseases at the Faculty of Veterinary Medicine. Worked at the Riga National Zoo until 2019. Since 2017, he has been working in one of the largest veterinary clinics in Estonia - Loomade Kiirabi Kliinik in Tallinn and specialises in exotic animal medicine and soft tissue surgery. Since 2022, he has been working as a lecturer at the Chair of Clinical Veterinary Medicine of the Estonian University of Life Sciences, Tartu, teaching surgery to students of Veterinary medicine! Nikolaj has presented various topics at educational events of Veterinary Education Centre of Latvia, receiving most appreciated reviews!
